## Practical Strategies

### [Understanding the Early Childhood Landscape of Services and Supports for Young Children Experiencing Homelessness](#)

The early childhood field encompasses a wide variety of service types and settings, as well as funding streams and regulatory systems. For those in the field, it can seem like a maze, or even a heavy fog. Fortunately, with a few key questions and sources of information, one can map out the local early childhood landscape.

The “Early Care and Education Infrastructure in My Community” grid provides a list of the key programs supported by public funds and legislation, and provides space to record what the program is called locally with the name and contact information for accessing the program and services quickly as needed.

## Resource Highlighter

[Voices of Youth Count](#) is an innovative, national policy research initiative designed to link evidence and action by capturing the experiences of runaway, unaccompanied homeless and unstably housed youth, more clearly defining the size of the population and scope of the issue, and driving compelling knowledge into the hands of the broad national community dedicated to ending youth homelessness.
